

BIMB ESG SUKUK FUND

Class B (USD)

FUND MANAGER'S REVIEW

The month of July saw global space being filled with busy schedule of events, where market players were keenly watching the UK PM election, with Boris Johnson elected as the UK's new prime minister. Both the European Central Bank and US Federal Reserve marched into a somewhat more dovish tone, cautioning on increased downside to growth. With the rising vulnerabilities of global growth to heightening trade tension between US-China, prospects of dovish tilt in monetary policies is expected to be supportive for global bonds including UST. The rapid tightening of UST yields on a year-to-date basis resonates continued dovish tilt, with odds of a 25 bps cut come September still looming as odds are showing more than 60% chance.

Malaysia Government Security (MGS) benchmarks yields continued to tighten further across the curve in July and early August amid renewed trade tension between US and China. It is viewed that prospects of a trade truce appears elusive for now. Prospects of further global monetary easing and fear of trade war escalation prompted UST yields to tighten further, increasing the allure of carry trade themes for Emerging Market (EM) Asian local currency bonds. Overall, investors still seen extending out of the curve in search of the higher yielding space. The local bond market remain supported anchored by current risk aversion sentiment, with investors rotating from equities into fixed income securities.

The Fund intends to invest between 70% to 98% of its NAV in Sukuk.
