KEY RISKS

16. What are the key risks associated with this product?

You are exposed to the following risks:

- a. **Specific Security Risk** – Specific security risk refers to the risk of investing in any particular security. Specific security risk includes but is not limited to legal suits, competitive operating environment, decline in profitability and mismanagement of a specific company issuing a security. Specific security risk could result in a decline in the price of the security and in turn cause a decline in the NAV of the Fund. This risk can be mitigated by security analysis conducted by the Manager.
- b. **Credit/Default Risk** – Credit risk relates to the creditworthiness of the issuers of the Sukuk and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the Sukuk. In the case of rated Sukuk, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a Sukuk either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the debt instruments. This could adversely affect the value of the Fund.
- c. **Profit/Interest Rate Risk** – Generally, changes in the level of general interest rates* may cause prices of Sukuk to change inversely. This risk can be mitigated by holding Sukuk investment until maturity, thereby locking in its yield. The Manager also manages profit/interest rate risk by considering each Sukuk's sensitivity to profit/interest rate changes as measured by its duration.

*Note: The term interest rate does not in any way suggest that this Fund will invest in securities or instruments which are Shariah non-compliant. All investments carried out for the Fund are in accordance with principles of the Shariah.

- d. **Reclassification of Shariah Status Risk** – This risk refers to the risk that the currently held Shariah-compliant securities which are listed on Bursa Malaysia (e.g. ordinary shares, warrants and transferable subscription rights) in the portfolio of the Fund may be reclassified to be Shariah non-compliant in the periodic review of the Shariah-compliant securities by the Shariah Advisory Council (SAC). If this occurs, the Manager will act in accordance with the guidance issued by the SAC to ensure that the Fund complies with the Shariah principles.

The Manager also has an internal Shariah Committee which meets once in every quarter to provide guidance and advice in ensuring the Fund's investments are conducted in accordance with Shariah rules and principles.

- e. **Counterparty Risk** – Counterparty risk refers to the risks that any financial institution that the Fund may deal with, under certain circumstances, fail to perform their obligations when due. This will result in the Fund to experience significant losses.
- f. **Structured Product Risk** – Structured products are subject to the risks associated with the underlying market or security, and may be subject to greater volatility than direct investments in the underlying market or security. Structured products may entail the risk of loss of principal and/or profit payments as a result of movements in the underlying market or security. This will result in the Fund to experience significant losses.
- g. **Collective Investment Scheme Risk** – Poor management of the Collective Investment Scheme (CIS) due to the lack of experience, knowledge, expertise and poor management techniques of the investment manager would have an adverse impact on the performance of the CIS. This may result in the Fund suffering loss in its investments in the CIS.
