KEY RISKS

16. What are the key risks associated with this product?

You are exposed to the following risks:

- Profit/Interest Rate Risk** – Generally, changes in the level of general interest rates* may cause prices of Sukuk to change inversely. This risk can be mitigated by holding Sukuk investment until maturity, thereby locking in its yield. The Manager also manages profit/interest rate risk by considering each Sukuk's sensitivity to profit/interest rate changes as measured by its duration.

*Note: The term interest rate does not in any way suggest that the Fund will invest in securities or instruments, which are Shariah non-compliant. All investments carried out for this Fund are in accordance with principles of the Shariah.

- b. **Counterparty Risk** – Counterparty risk refers to the risks that any financial institution that BIMB Dana Al-Fakhim may deal with, under certain circumstances, fail to perform their obligations when due. This will result in the Fund to experience significant losses.
- c. **Default Risk** – The risk arises when an issuer is unable to service any periodic obligations, e.g. profit payments and/or pay the principal amount when due. In such cases, investors will suffer significant losses. This risk can be mitigated by investing in Sukuk, carrying a minimum rating of AA3 by RAM or AA- by MARC or its equivalent by any other recognised credit rating agencies or a minimum short-term credit rating of P1 by RAM or MARC-1 by MARC or its equivalent by any other recognised credit rating agency. This risk is also mitigated by credit analysis conducted by the Manager to determine the issuer’s ability to service promised payments.
