1.0 MANAGER'S REPORT

Dear Unit Holders,

We are pleased to present the Manager's Report of BIMB ESG Sukuk Fund for the 6 months financial period ended 30 April 2021.

1.1 Fund Name/ Fund Type/ Fund Category/ Investment Objective/ Benchmark/ Distribution Policy

Fund Name	BIMB ESG Sukuk Fund
Fund Type	Income
Fund Category	Sukuk
Investment Objective	The Fund seeks to provide a stable income stream and an opportunity for capital appreciation over the medium to long term by investing in Sukuk both locally and globally. Medium to long term refers to an investment horizon of three (3) years or more. Any material changes to the Fund's investment objective would require Unit Holders' approval.
Benchmark	Term Deposit-i Tawarruq of Bank Islam Malaysia Berhad 1-year rate.
Distribution Policy	Subject to availability of income, the Fund will distribute income on an annual basis.

1.2 Performance for the 6 Months Financial Period Ended 30 April 2021

1.2.1 Performance Review

For the financial period under review, the Fund's Class A and Class D (i.e. RM Class) registered total return of -1.38%, Class B and Class E (i.e. USD Class) registered total return of +0.16%, while Class C (i.e. SGD Class) registered total return of -2.53%. All classes underperformed the Benchmark which returned 0.92% for the period.

The selected performance benchmark for the Fund is Term Deposit-i Tawarruq of Bank Islam Malaysia Berhad 1-year rate.

The Fund continue to be managed in line with its stated objective by investing in Sukuk both locally and globally to provide a stable income stream and an opportunity for capital appreciation over the medium to long term. However in February and March, the yield curve had steepened considerably due to market anticipating interest rate to be hiked earlier due to inflationary pressure. The Fund's Sukuk holdings suffered from price correction as a result.

As at 30 April 2021, the Fund has 74.60% exposure in Sukuk. The total net asset value (NAV) of the Fund as at 30 April 2021 is RM178.99 million while the NAV per unit of the Fund is RM0.2499 for RM Class, USD0.2509 for USD Class and SGD0.2426 for SGD Class.

For the financial period under review, there was no significant changes to the state of affairs of the Fund and no circumstance that materially affect the interest of unit holders that have taken place up to the date of this Manager's report.

1.3 Economy and Market Review

1.3.1 Economy

a) Global

- Gross Domestic Product (GDP) of the United States (US) expanded 0.40% in the first quarter of 2021 over the same quarter of the previous year. Quarter-on-quarter basis, GDP increased at 6.4% annualised rate following a 4.3% expansion in the previous three months period.
- The Euro area economy shrank 1.8% year-on-year in the first quarter of 2021 following a 4.9% slump in the previous three-month period, as countries implemented new lockdowns and restrictions amid a third wave of Covid-19 infections.
- China's economic recovery quickened sharply in the first quarter to record growth of 18.3% from last year's first quarter deep slump caused by Covid-19 pandemic, propelled by stronger demand at home and abroad and continued government support for smaller firms.

b) Local

 Malaysia's GDP shrank by 0.5% year-on-year in the first quarter of 2021, with January and February registering a decline of 3.5% and 3.6% respectively while March 2021 rebounded by 6.0%, owing much to the low base effect from the previous year.

1.3.2 Market Review

Bond Market and Money Market

• The 10-year U.S. Treasury (UST), an lead indicator yield measure used in the fixed income markets, ended Q1 2021 with a rate of 1.74%, an exceptional increase from 0.91% at the end of 2020, and the highest yield since before the pandemic began. The UST yield curve has "steepened" markedly so far this year as short-term yields have fallen a bit and longer-term yields have risen significantly. However, in April 2021, the UST yield ended lower, a reversal from prior months seen since November 2020.

 For the local bond market, local government bond/sukuk tracking UST movements with the curve bear-steepening as overall benchmark yields spiked between 25-86 bps. EPF's restrained bond market activities for 1H2021 due to the various withdrawal schemes, coupled with the higher projected total government debt-to-GDP ratio of 58.5% for end-2021 by Ministry of Finance, weighed on the curve.

1.4 Market Outlook and Strategy

Looking forward, bond yields will potentially increase in 2021 as global economic recovery shows better progress, aided by fiscal and monetary support by governments and central banks. On the back of this, our strategy is to invest in sukuk with short to medium term duration.

1.0 LAPORAN PENGURUS

Para Pemegang Unit,

Kami dengan sukacitanya membentangkan Laporan Pengurus Dana BIMB ESG Sukuk bagi tempoh kewangan 6 bulan berakhir 30 April 2021.

1.1 Nama Dana/ Jenis Dana/ Kategori Dana/ Objektif Pelaburan Dana/ Penanda Aras Dana/ Polisi Agihan Dana

Nama Dana	Dana BIMB ESG Sukuk
Jenis Dana	Pendapatan
Kategori Dana	Sukuk
Objektif Pelaburan	Dana ini menawarkan aliran pendapatan yang stabil dan peluang peningkatan modal dalam jangka masa sederhana hingga panjang dengan melabur di dalam pasaran Sukuk dalam dan luar negara. Jangka masa sederhana hingga panjang merujuk kepada tiga tahun atau lebih. Sebarang perubahan kepada objektif pelaburan memerlukan kelulusan daripada Pemegang Unit.
Penanda Aras	Kadar 1-tahun Deposit Bertempoh-i Tawarruq Bank Islam Malaysia Berhad.
Polisi Agihan	Tertakluk kepada ketersediaan pendapatan, Dana akan mengagihkan pendapatan secara tahunan.

1.2 Prestasi Dana bagi Tempoh Kewangan 6 Bulan Berakhir 30 April 2021

1.2.1 Kajian prestasi

Bagi tempoh kewangan dalam kajian, Kelas A dan Kelas D Dana (iaitu Kelas RM) mencatatkan jumlah pulangan sebanyak -1.38%, Kelas B dan Kelas E (iaitu Kelas USD) mencatatkan jumlah pulangan +0.16%, manakala Kelas C (iaitu Kelas SGD) mencatatkan jumlah pulangan sebanyak -2.53%. Semua kelas mencatatkan prestasi lebih rendah berbanding Penanda Aras yang mencatatkan pulangan 0.92% untuk tempoh tersebut.

Penanda aras prestasi terpilih bagi Dana ini adalah kadar 1-tahun Deposit Bertempoh-i Tawarruq Bank Islam Malaysia Berhad.

Dana terus diuruskan selari dengan objektifnya dengan melabur dalam Sukuk tempatan dan luar negara untuk menghasilkan pendapatan yang stabil dan peluang peningkatan modal dalam jangka masa sederhana hingga panjang. Namun, pada bulan Februari dan Mac, lengkung kadar hasil meningkat curam lantaran pasaran menjangkakan kadar faedah bakal dinaikkan lebih awal kerana tekanan inflasi. Ini mengakibatkan pegangan Sukuk Dana mengalami kemerosotan harga.

Setakat 30 April 2021, Dana mempunyai pendedahan 74.60% di dalam Sukuk. Jumlah Nilai Aset Bersih (NAB) Dana pada 30 April 2021 adalah sebanyak RM178.99 juta manakala NAB seunit Dana adalah RM0.2499 untuk Kelas RM, USD0.2509 untuk Kelas USD dan SGD0.2426 untuk Kelas SGD.

Bagi tempoh kewangan dalam kajian, tiada sebarang perubahan ketara dalam hal ehwal Dana dan tidak berlaku sebarang keadaan yang secara material memberi kesan kepada kepentingan Pemegang Unit sehingga tarikh Laporan Pengurus ini disediakan.

1.3 Ekonomi dan Kajian Pasaran

1.3.1 Ekonomi

a) Global

 Keluaran Dalam Negara Kasar (KDNK) Amerika berkembang 0.40% pada suku pertama 2021 berbanding suku yang sama tahun sebelumnya. Berasaskan suku-kesuku, KDNK meningkat pada kadar tahunan sebanyak 6.4% berikutan peningkatan 4.3% dalam tempoh tiga bulan sebelumnya.

- Ekonomi zon Euro menguncup sebanyak 1.8% tahun-ke-tahun pada suku pertama 2021 berikutan penurunan 4.9% dalam tempoh tiga bulan sebelumnya, ketika negara-negara melaksanakan penutupan ekonomi dan sekatan-sekatan baru dalam menangani gelombang ketiga penularan Covid-19.
- Pemulihan ekonomi negara China bertambah pantas dalam suku pertama tahun ini untuk mencatatkan pertumbuhan sebanyak 18.3% berbanding dengan kemerosotan teruk yang dialami suku pertama tahun lalu akibat pandemik Covid-19, hasil permintaan yang lebih tinggi dari dalam dan luar negara serta sokongan kerajaan yang berterusan untuk syarikatsyarikat kecil.

(Sumber: Bureau of Economic Analysis, CNBC, Trading Economics)

b) Dalam Negara

 KDNK Malaysia merosot 0.5% tahun-ke-tahun bagi suku pertama 2021, dengan Januari dan Februari masing-masing mencatatkan penurunan sebanyak 3.5% dan 3.6%, sementara Mac mencatatkan peningkatan 6.0%, disebabkan asas yang rendah dari tahun sebelumnya.

1.3.2 Kajian Pasaran

Pasaran Sukuk dan Pasaran Wang

- Kadar Perbendaharaan Amerika Syarikat (UST) 10 tahun, petunjuk utama yang digunakan dalam pasaran pendapatan tetap, mengakhiri suku pertama 2021 pada kadar 1.74%, iaitu kenaikan luar biasa berbanding kadar 0.91% yang dicatatkan pada akhir tahun 2020, menjadikannya kadar hasil tertinggi sejak pandemik Covid-19 bermula. Lengkung kadar hasil UST telah meningkat curam pada tahun ini yang mana kadar hasil jangka pendek menurun sedikit manakala kadar hasil jangka panjang meningkat dengan ketara. Namun pada bulan April 2021, kadar UST 10 tahun berakhir lebih rendah, setelah meningkat setiap bulan sejak bulan November 2020.
- Bon / sukuk kerajaan tempatan mengikuti pergerakan UST dengan lengkung kadar hasil meningkat curam yang mana hasil penanda aras keseluruhannya melonjak antara 25-86 mata asas. Aktiviti pasaran bon KWSP yang terhad akibat pelbagai skim pengeluaran , serta nisbah hutang kerajaan berbanding KDNK yang diunjurkan meningkat ke 58.5% untuk akhir tahun 2021 oleh Kementerian Kewangan, juga telah memberi kesan kepada lengkung kadar hasil.

1.4 Tinjauan Pasaran dan Strategi

Memandang ke hadapan, kadar hasil sukuk berpotensi menjadi lebih tinggi pada tahun 2021 di kala pemulihan ekonomi global menjadi lebih baik, dibantu sokongan fiskal dan monetari oleh kerajaan dan bank-bank pusat. Berlatarbelakangkan ini, strategi kami adalah untuk melabur dalam sukuk yang mempunyai tempoh pegangan pendek hingga sederhana.

UNAUDITED NOTES TO THE FINANCIAL STATEMENTS FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 30 APRIL 2021

1 INFORMATION ON THE FUND

BIMB ESG Sukuk Fund (hereinafter referred to as "the Fund") was constituted pursuant to the execution of a Deed dated 20 April 2018 between the Manager - BIMB Investment Management Berhad and the Trustee - SCBMB Trustee Berhad.

The principal activity of the Fund is to invest in authorised investments as defined in the Deed, which include investment in Islamic debt securities both locally and globally and short term placements.

The Fund is established with a multi-class structure comprising of five (5) different classes of Class A for retail investors denominated in Ringgit Malaysia, Class B for retail investors denominated in US Dollar, Class C for retail investors denominated in SG Dollar, Class D for institutional investors denominated in Ringgit Malaysia and Class E for institutional investors denominated in US Dollar.

The Manager, BIMB Investment Management Berhad, a company incorporated in Malaysia, is a subsidiary of Bank Islam Malaysia Berhad.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following accounting policies have been used consistently in dealing with items which are considered material in relation to the financial statements:

(a) Basis of preparation

The financial statements of the Fund have been prepared in accordance with Malaysian Financial Reporting Standards ("MFRS") and International Financial Reporting Standards ("IFRS").

The financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets at fair value through profit or loss ("FVTPL").

The preparation of financial statements in conformity with MFRS requires the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reported period.

It also requires the Manager to exercise their judgment in the process of applying the Fund's accounting policies. Although these estimates and judgment are based on the Manager's best knowledge of current events and actions, actual results may differ.

The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 2(k).

UNAUDITED NOTES TO THE FINANCIAL STATEMENTS FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 30 APRIL 2021 (CONTINUED)

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

- (a) Basis of preparation (continued)
 - (i) Standards, amendments to published standards and interpretations that are effective

The Fund has applied the following standards and amendments for the first time for the financial year beginning on 1 November 2019:

- IC Interpretation 23 'Uncertainty over Income Tax Treatments'
- Annual Improvements to MFRSs 2015 2017 Cycle

The adoption of amendments listed above did not have any impact on the current period or any prior period and is not likely to affect future periods.

(b) Financial assets

(i) Recognition and initial measurement

A financial instrument is recognised in the statement of financial position when, and only when, the Fund becomes a party to the contractual provisions of the instrument.

A financial asset (unless it is a trade receivable without significant financing component) or a financial liability is initially measured at fair value plus or minus, for an item not at fair value through profit or loss, transaction costs that are directly attributable to its acquisition or issuance. A trade receivable without a significant financing component is initially measured at the transaction price.

Categories of financial assets are determined on initial recognition and are not reclassified subsequent to their initial recognition unless the Fund changes its business model for managing financial assets in which case all affected financial assets are reclassified on the first day of the first reporting year following the change of the business model.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

- (b) Financial assets (continued)
 - (i) Recognition and initial measurement (continued)

The Fund categorises financial instruments as follows:

(a) Amortised cost

Amortised cost category comprises financial assets that are held within a business model whose objective is to hold assets to collect contractual cash flows and its contractual terms give rise on specified dates to cash flows that are solely payments of principal and profit on the principal amount outstanding. The financial assets are not designated as fair value through profit or loss. Subsequent to initial recognition, these financial assets are measured at amortised cost using the effective profit method. The amortised cost is reduced by impairment losses. Profit income, foreign exchange gains and losses and impairment are recognised in profit or loss.

Profit income is recognised by applying effective profit rate to the gross carrying amount except for credit impairment financial assets (see Note 2 (b)(iv)) where the effective profit rate is applied to the amortised cost.

(b) Fair value through profit or loss

All financial assets not measured at amortised cost or fair value through other comprehensive income as described above are measured at fair value through profit or loss. On initial recognition, the Fund may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at fair value through other comprehensive income as at fair value through profit or loss if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial assets categorised as fair value through profit or loss are subsequently measured at their fair value. Net gains or losses, including any profit or dividend income, are recognised in the profit or loss.

(ii) Financial instrument categories and subsequent measurement

All financial assets, except for those measured at fair value through profit or loss, are subject to impairment assessment (see Note 2(b)(iv)).

UNAUDITED NOTES TO THE FINANCIAL STATEMENTS FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 30 APRIL 2021 (CONTINUED)

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(b) Financial assets (continued)

(iii) Derecognition

A financial asset or part of it is derecognised when, and only when, the contractual rights to the cash flows from the financial asset expire or the financial asset is transferred to another party without retaining control or substantially all risks and rewards of the asset. On derecognition of a financial asset, the difference between the carrying amount and the sum of the consideration received (including any new asset obtained less any new liability assumed) and any cumulative gain or loss that had been recognised in equity is recognised in profit or loss.

A financial liability or a part of it is derecognised when, and only when, the obligation specified in the contract is discharged or cancelled or expires. On derecognition of a financial liability, the difference between the carrying amount of the financial liability extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss.

(iv) Impairment for assets carried at amortised cost

The Fund measures credit risk and expected credit loss ("ECL") using probability of default, exposure at default and loss given default. The Manager considers both historical analysis and forward looking information in determining any ECL. The Manager considers the probability of default to be close to zero as these instruments have a low risk of default and the counterparties have a strong capacity to meet their contractual obligations in the near term. As a result, no loss allowance has been recognised based on 12-month ECL as any such impairment would be wholly insignificant to the Fund.

Significant increase in credit risk

A significant increase in credit risk is defined by management as any contractual payment which is more than 90 days past due.

Definition of default and credit-impaired financial assets

Any contractual payment which is more than 90 days past due is considered credit impaired.

Write-off

The Fund writes off financial assets, in whole or in part, when it has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. The assessment of no reasonable expectation of recovery is based on unavailability of debtor's sources of income or assets to generate sufficient future cash flows to repay the amount. The Fund may write-off financial assets that are still subject to enforcement activity. Subsequent recoveries of amounts previously written off will result in impairment gains. There are no write-offs/recoveries during the financial period.

UNAUDITED NOTES TO THE FINANCIAL STATEMENTS FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 30 APRIL 2021 (CONTINUED)

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(c) Financial liabilities

The categories of financial liabilities at initial recognition are as follows:

Amortised cost

Other financial liabilities not categorised as fair value through profit or loss are subsequently measured at amortised cost using the effective profit method.

(d) Income recognition

Profit income from Shariah-compliant deposits with licensed Islamic financial institutions and Sukuk is recognised as it accrues, using the effective profit method in profit or loss.

Realised gains or losses on disposal of investments is accounted for as the difference between the net disposal proceeds and the carrying amount of investments, determined on cost adjusted for accretion of discount or amortisation of premium.

(e) Cash and cash equivalents

Cash and cash equivalents consist of cash at bank and short term placements with licensed financial institutions which have insignificant risk of changes in fair value with original maturities of less than 3 months, and are used by the Fund in the management of its short term commitments.

Cash and cash equivalents are categorised and measured as amortised cost.

(f) Income tax

Income tax expense comprises current tax. Current tax is recognised in profit or loss except to the extent that it relates to items recognised directly in equity or other comprehensive income.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the statement of financial position date.

(g) Distribution

A distribution to the Fund's unit holders is accounted for as finance cost in the statement of comprehensive income. A proposed distribution is recognised as a liability in the period in which it is approved by the Trustee of the Fund.

UNAUDITED NOTES TO THE FINANCIAL STATEMENTS FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 30 APRIL 2021 (CONTINUED)

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(h) Creation and cancellation of units

The unit holders' contributions to the Fund meet the definition of puttable instruments classified as financial liability under MFRS 132 "Financial Instruments: Presentation".

The Fund issues cancellable units, in five classes of units, known respectively as Class A, Class B, Class C, Class D and Class E which are cancelled at the unit holder's option. Cancellable units can be put back to the Fund at any time for cash equal to a proportionate share of the Fund's NAV of respective classes. The outstanding units are carried at the redemption amount that is payable at the date of statement of financial position if the unit holder exercises the right to put the unit back to the Fund.

Units are created and cancelled at the unit holder's option at prices based on the Fund's NAV per unit of respective classes at the close of business on the relevant dealing day. The Fund's NAV per unit of respective classes is calculated by dividing the net assets attributable to unit holders of respective classes with the total number of outstanding units of respective classes. In accordance with the Securities Commission's Guidelines on Unlisted Capital Market Products under the Lodge and Launch Framework in Malaysia, investment positions are valued based on the last traded market price for the purpose of determining the NAV per unit for creations and cancellations.

(i) Increase/Decrease in net assets attributable to unit holders

Income not distributed is included in net assets attributable to unit holders.

(j) Functional and presentation currency

Items included in the financial statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates (the "functional currency"). The financial statements are presented in Ringgit Malaysia ("RM"), which is the Fund's functional and presentation currency.

(k) Use of estimates and judgements

The preparation of financial statements in conformity with MFRSs requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the year in which the estimate is revised and in any future years affected.

Estimate of fair value of unquoted Sukuk

In undertaking any of the Fund's Shariah-compliant investments, the Manager will ensure that all assets of the Fund under management will be valued appropriately, that is at fair value and in compliance with the Securities Commission's guidelines on Unit Trust Funds in Malaysia.

UNAUDITED NOTES TO THE FINANCIAL STATEMENTS FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 30 APRIL 2021 (CONTINUED)

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(k) Use of estimates and judgements (continued)

Estimate of fair value of unquoted Sukuk (continued)

Ringgit-denominated unquoted Sukuk are valued using fair value prices quoted by a BPA. Where the Manager is of the view that the price quoted by BPA for a specific unquoted Sukuk differs from the market price by more than 20 bps, the Manager may use market price, provided that the Manager records its basis for using a non-BPA price, obtains necessary internal approvals to use the non-BPA price, and keeps an audit trail of all decisions and basis for adopting the use of non-BPA price.

3 FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (CONTINUED)

All liabilities are financial liabilities which are carried at amortised cost.

The Fund aims to provide investors with liquidity and regular income, whilst maintaining capital stability by investing primarily in deposits that comply with Shariah principles.

The Fund is exposed to a variety of risks which include market risk (inclusive of price risk, profit rate risk and foreign currency risk), credit risk and liquidity risk.

Financial risk management is carried out through internal control process adopted by the Manager and adherence to the investment restrictions as stipulated in the Deed and the Guidelines.

(a) Market risk

(i) Price risk

The Fund is exposed to price risk because of investments held by the Fund and classified as at fair value through profit or loss. Price risk is the risk that fair value of investment will fluctuate because of the changes in market prices (other than those arising from profit rate risk). Such fluctuation may cause the Fund's NAV and price of units to fall as well as rise, and income produced by the Fund may also fluctuate. The price risk is managed through diversification and selection of securities and other financial instruments within specified limits according to the Deed.

The table below shows the financial instruments of the Fund which is exposed to price risk.

As at 31.10.2020 Investments in quoted and unquoted Sukuk	5	7,439,699
investinents in quoted and unquoted Sukuk		7,439,099

(ii) Profit rate risk

In general, when profit rates rise, unquoted Sukuk prices will tend to fall and vice versa. Therefore, the NAV of the Fund may also tend to fall when profit rates rise or are expected to rise. However, investors should be aware that should the Fund holds an unquoted Sukuk till maturity, such price fluctuations would dissipate as it approaches maturity, and thus the growth of the NAV shall not be affected at maturity. In order to mitigate profit rates exposure of the Fund, the Manager will manage the duration of the portfolio via shorter or longer tenured assets depending on the view of the future profit rate trend of the Manager, which is based on its continuous fundamental research and analysis.

Although unquoted Sukuk is a non-profit bearing instrument, investors should note that the movement in prices of unquoted Sukuk are correlated to the movement in profit rates. As such, the investments in unquoted Sukuk are exposed to the movement of the profit rates. Even though the Fund does not invest in profit bearing instruments, the profit rate referred herein is to the general profit rate of the country, which may affect the value of the investment of the Fund. However, it does not in any way suggest that this Fund will invest in conventional financial instruments. All investments carried out for the Fund including placement and deposits are in accordance with Shariah.

This risk is crucial since unquoted Sukuk portfolio management depends on forecasting profit rate movements. Prices of unquoted Sukuk move inversely to profit rate movements, therefore as profit rates rise, the prices of unquoted Sukuk decrease and vice versa. Furthermore, unquoted Sukuk with longer maturity and lower yield profit rates are more susceptible to profit rate movements.

Such investments may be subject to unanticipated rise in profit rates which may impair the ability of the issuers to meet the obligation under the instrument, especially if the issuers are highly leveraged.

The table below summarises the sensitivity of the Fund's profit or loss and NAV to movements in prices of unquoted Sukuk held by the Fund as a result of movement in profit rate at the end of each reporting year. The analysis is based on the assumptions that the profit rate changed by 1% with all other variables held constant. This represents management's best estimate of a reasonable possible shift in the profit rate, having regard to the historical volatility of the profit rate.

(iii) Foreign currency risk

Foreign currency risk is associated with investments that are quoted and/or priced in foreign currency denomination. Foreign currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates. The Manager will evaluate the likely directions of a foreign currency versus USD based on considerations of economic fundamentals such as profit risk differentials, balance of payments position, debt levels, and technical chart considerations.

The following table sets out the foreign currency risk concentrations arising from the denomination of the Fund's financial instruments in foreign currencies:

The table below summarises the sensitivity of the Fund's profit or loss and NAV to changes in foreign exchange movements at the end of each reporting year. The analysis is based on the assumption that the foreign exchange rate fluctuates by 5%, with all other variables remain constants. This represents management's best estimate of a reasonable possible shift in the foreign exchange rate, having regard to historical volatility of this rate. Disclosures below are shown in absolute terms, changes and impacts could be positive or negative.

(b) Credit risk

Credit risk is the risk of a financial loss to the Fund if counterparty to a financial instrument fails to meet its contractual obligations. The Fund's exposure to credit risk arises principally from its cash and cash equivalents, amount due from stockbrokers, amount due from Manager and other receivables.

The Manager manages the credit risk by setting counterparty limits and undertaking credit evaluation to minimise the risk. The exposure to credit risk is monitored on an ongoing basis.

The following table sets out the credit risk concentration of the Fund:

All the financial assets of the Fund as at end of the financial period are neither past due nor impaired.

(c) Liquidity risk

Liquidity risk is the risk that the Fund will not be able to meet its financial obligations as they fall due. The Fund's exposure to liquidity risk arises principally from its other payables which are due within one year.

The Fund maintains sufficient level of liquid assets, after consultation with the Trustee, to meet anticipated payments and cancellation of units by unit holders. Liquid assets comprise cash at bank and other instruments, which are capable of being converted into cash within 7 days.

(d) Capital risk management

The Fund's capital is represented by the unit holders' capital in the statement of financial position. The Manager of the Fund monitors the adequacy of capital on an ongoing basis. There is no external capital requirement imposed on the Fund.

(e) Fair value estimation

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e. an exit price).

The fair value of financial assets traded in active markets (such as trading securities) are based on quoted market prices at the close of trading on the financial period/year end date. The Fund utilises the last traded market price for financial assets where the last traded price falls within the bid-ask spread. In circumstances where the last traded price is not within the bid-ask spread, the Manager will determine the point within the bid-ask spread that is most representative of the fair value.

An active market is a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

The fair value of financial assets that are not traded in an active market is determined by using valuation techniques.

(i) Fair value hierarchy

The table below analyses financial instruments carried at fair value. The different levels have been defined as follows:

- Quoted prices (unadjusted) in active market for identical assets or liabilities (Level 1)
- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2)
- Inputs for the asset and liability that are not based on observable market data (that is, unobservable inputs) (Level 3)

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety.

If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement.

3 FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (CONTINUED)

(e) Fair value estimation (continued)

(i) Fair value hierarchy (continued)

Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgment by the Fund. The Fund considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. This includes quoted and unquoted Sukuk. As Level 2 instruments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information. The Fund's policies on valuation of these financial assets are stated in Note 2(b).

The carrying values of cash and cash equivalents, amount due from Manager, other receivables and all current liabilities are a reasonable approximation of their fair values due to their short term nature.

	<u>As at</u>	<u>As at</u>
	<u>30.4.2021</u>	30.4.2020
MER	1.35	1.27

MER is derived from the following calculation:

 $MER = \underbrace{(A + B + C + D + E) \times 100}_{F}$

A = Management fee

B = Trustee's and custodian fees

C = Audit fee
D = Tax agent's fee
E = Other expenses

F = Average NAV of the Fund calculated on a daily basis

The average NAV of the Fund for the financial period calculated on a daily basis is RM166,457,647 (As at 30.4.2020: RM202,466,455).

14 SIGNIFICANT EVENT DURING THE FINANCIAL PERIOD

The worsening macro-economic outlook as a result of COVID-19, both domestically and globally, has contributed to the deterioration of the Fund's Net Asset Value per unit as of the date of this report. This is mainly due to the decrease in fair value of the Fund's investments at fair value through profit or loss.

The Manager is monitoring the situation closely and will be actively managing the portfolio to achieve the Fund's objective.

15 APPROVAL OF FINANCIAL STATEMENTS

The financial statements have been approved by the Manager on 28 June 2021.
