KEY RISKS

6. What are the key risks associated with this product?

General Risks of Investing in the Fund

- **Market Risk** – Market risk refers to the possibility that an investment will lose its value because of a general decline in financial/equity markets, due to economic, political and/or other factors, which will result in a decline in the Fund's NAV.
- **Financing Risk** – This risk occurs when investors take a financing to finance their investment. The inherent risk of investing with financed money includes the inability for investors to service the financing payments. In the event Units are used as collateral, an investor may be required to top-up the collateral if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower value towards settling the loan.

Other financing risk factors to consider include:

- the higher the margin of financing, the greater the potential for losses as well as gains; and

- if the financing taken is a variable profit rate financing and profit rates rise, the total repayment amount will increase.
- **Manager's Risk** – This risk refers to the day-to-day management of the Fund by the Manager which will impact the performance of the Fund. For example, investment decisions undertaken by the Manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
- **Shariah Non-Compliance Risk** – This risk refers to the risk that the Fund not conforming to Shariah guidelines. The Manager (as advised by the Shariah Adviser) would be responsible for ensuring that the Fund is managed and administered in accordance with Shariah guidelines.

Any Shariah non-compliant investment made by the Fund due to error of the administration shall be disposed of or withdrawn with immediate effect, if possible, or otherwise within one (1) calendar month of knowing the status of the investment. Any gain resulting from the said disposal shall be channeled to *baitulmal* and/or charitable bodies as advised by the Shariah Adviser whilst any loss is to be borne by the Manager.

- **Operational risk** – This risk refers to the possibility of monetary loss or inconvenience due to the breakdown of the Manager's internal control and policies due to human error, system failure or fraud among Manager's employees. The Manager will regularly review its internal policies, systems capabilities and maintain strict segregation of duties in mitigating these risks.

Specific Risks Associated with Investing in the Fund

- **Collective Investment Scheme ("CIS") Risk** – Any adverse effect on the Islamic CIS which the Fund is investing in will impact the NAV of the Fund. For example, the CIS may underperform its benchmarks due to poor market conditions and as a result, the NAV of the Fund will be adversely affected as the performance of the Fund is dependent on the performance of the CIS.
- **Liquidity Risk** – Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund holds assets that are illiquid, or are difficult to dispose of, the value of the Fund will be negatively affected when it has to sell such assets at unfavorable prices.
- **Country Risk** – Investments of the Fund in any countries may be affected by changes in the country's economic, social and political stability, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund or prices of units to fall.
- **Currency Risk** – As the investments of the Fund may be denominated in currencies other than the Base Currency, any fluctuation in the exchange rate between the Base Currency and the currencies in which the investments are denominated may have an impact on the value of these investments. Investors should be aware that if the currencies in which the investments are denominated depreciate against the Base Currency, this will have an adverse effect on the NAV of the Fund in the Base Currency and vice versa.

Investors should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

- **Related Party Transaction Risk** – The Fund may invest in BIMB Investment's CIS and may also have dealings with parties related to BIMB Investment.

It is the Manager's policy that all transactions with related parties are to be executed on terms which are best available to the Fund and which are not less favourable to the Fund than an arms-length transaction between independent parties.

- **Credit/Default Risk** – The risk arises when the issuer of a sukuk or Islamic money market instrument is unable to service any periodic obligations, e.g., profit payments and/or pay the principal amount when due. In such cases, investors will suffer significant losses. This risk can be mitigated by credit analysis conducted by the Manager to determine the issuer’s ability to service promised payments.
- **Profit Rate Risk** – Changes in the level of general profit rates may cause prices of Islamic money market instrument to change inversely. The Manager manages profit rate risk of Islamic money market instruments by considering their sensitivity to profit rate changes as measured by its duration.

Essentially, the investment of Fund has been structured such that it is confined to short-term instruments in order to mitigate the impact of fluctuations in profit rates on the performance of the Fund over the short- term.

- **Shariah Status Reclassification Risk** – This risk refers to the risk of a possibility that the currently held Islamic collective investment schemes or Islamic deposits or Islamic money market instruments invested by the Fund may be reclassified or declared as Shariah non-compliant by the relevant authority or the Shariah Adviser. If this occurs, the Manager will take the necessary steps to dispose of or withdraw such investments. There may be opportunity loss to the Fund due to the Fund not being allowed to retain the excess capital gains derived from the disposal of the said investments.

Specific Risk Associated to the CIS in which the Fund Invests

- **Equity Investment Risk** – The buying and selling of equities carry a number of risks. The value of equities investment depends on its earning potential, sound management and a myriad of other factors. Failure to achieve the expected earnings would result in declining equities value.

IT IS IMPORTANT TO NOTE THAT EVENTS AFFECTING THE INVESTMENTS CANNOT ALWAYS BE FORESEEN. THEREFORE, IT IS NOT ALWAYS POSSIBLE TO PROTECT INVESTMENTS AGAINST ALL RISKS. YOU ARE ADVISED TO READ THE FUND’S INFORMATION MEMORANDUM TO ASSESS THE RISKS ASSOCIATED WITH THE FUND.

INVESTORS ARE REMINDED THAT THE ABOVE LIST OF RISKS MAY NOT BE EXHAUSTIVE AND IF NECESSARY, INVESTORS SHOULD CONSULT YOUR PROFESSIONAL ADVISER(S), FOR A BETTER UNDERSTANDING OF THE RISKS.

NOTE: PLEASE REFER TO THE FUND’S INFORMATION MEMORANDUM FOR FURTHER DETAILS OF EACH RISK.

IF YOUR INVESTMENTS ARE MADE THROUGH THE DISTRIBUTOR (I.E. THE INSTITUTIONAL UNIT TRUST ADVISER (“IUTA”) VIA A NOMINEE SYSTEM OF OWNERSHIP), YOU WOULD NOT BE DEEMED TO BE A UNIT HOLDER UNDER THE DEED AND AS A RESULT, YOU MAY NOT EXERCISE ALL THE RIGHTS ORDINARILY CONFERRED TO A UNIT HOLDER (E.G.
